

# What is *Matside Entry*?

*Matside Entry* is companion software to *Champion Wrestling Stats*. This product allows coaches, statisticians, etc. to enter stats away from the desktop or laptop computer and later downloaded to their desktop computer.

Entry of stats can be done with any mobile device that has Internet capability (wireless, 3G, 4G). These mobile devices can be iPads, iPhones, tablets or smartphones.

The program, *Matside Entry*, resides on a **Mobile Web** server maintained by **Preferred Educational Software**. No software is installed on their mobile device.

When a subscription for *Matside Entry* is purchased, the user creates a school account and is given login credentials (**Login ID and Password**). The user opens their browser and logs in at [www.mobilecws.com](http://www.mobilecws.com).

School information (wrestlers, opposing schools, and program settings) is uploaded to the account of the user. Match information is entered by tapping on maneuvers as they occur on the mobile device. Some coaches even enter matches out of the scorebook in between rounds or on the bus ride home.

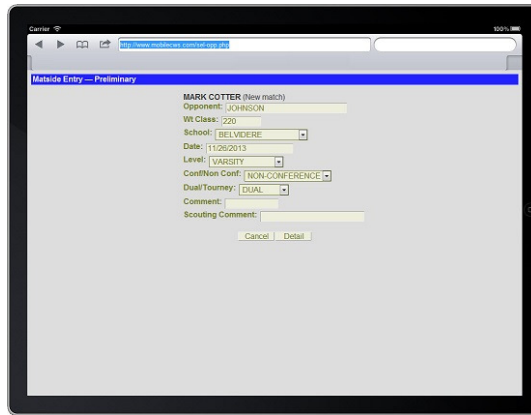

The *Matside Entry* subscription (**Annual** or **Lifetime**) is a building license allowing multiple users to access their school's account at one time making it convenient when there are multiple mats or levels (Varsity, Junior Varsity, etc.) at different locations.

At the end of the meet or tournament, the coach downloads the matches for the previous match or tournament into his desktop computer where all season stats reside.
